open them. Select the new formats that you want to search into. Click on one of the formatted files. When the text is found, it will be highlighted in the Search box. You can now use the Backspace key to delete the highlighted word from the beginning of the search box. Then type the word again and press Enter key to find the searched word. If you press F3, you will go to the next occurrence of the searched word. A list of plugins that install when you click the button The number of plugins that install when you click the button has increased to 7 from 6 in the previous version of the plugin. This increase is not only in number, but also comes with new features like search and text formatting.

The new features, as described in the title, are all there in the plugin, but they are added in a different way. First, there is the search, as I have described in the previous version of the plugin. In the third and last screenshot, you can see the Search bar in the right pane when we select More on the toolbar. Following this, in the fourth and fifth screenshots, we can see the formatting of the word searches in the right pane. In the second and third screenshot, you can see the Search bar in the right pane when we select More on the toolbar. The remaining two pictures show, respectively, the results in the left pane, and the selection of the plugins from the button, in the order that they are listed in the interface.
